Custom made plunge pools & spas

Australian Plunge Pools is a custom made plunge pool manufacturer distributing a unique product to the Australian Pool and Hydrotherapy market

Easy Process

Installing an Australian Plunge Pool is much easier than a traditional pool due to the fact the building process is handled in our factory by expertly trained staff in controlled conditions rather than being completed onsite over a long period of time. We have a network of installers who offer full Turnkey Solutions or installation only. You can also select a DIY (Project Management) process, arranging required trades and certify yourself.

All our Plunge Pools can be installed in or above ground. The process is:

- ✓ Select your installation method:
 - Full Turnkey Solution
 - Installation Only
 - DIY (Project Management)
- ✓ Order your custom Plunge Pool
- ✓ Complete seating, layout, tile selection and extras
- ✓ Confirm your estimated delivery date

Our usual time frame is approximately 6-10 weeks. It is sometimes possible to build a pool in a shorter time frame, best to let us know your project requirements and we can check with the factory. If you have a time frame to meet please keep us in the loop and we will try to accommodate where possible.

All we need to get the ball rolling is:

- The site address
- The pools size
- The proposed location of the pool on site

Rectangle

Exterior Size: 4.5m x 2.45m
 Interior Size: 4.14m x 2.09m
 Max Water Depth: 1.4m
 Volume: 12,000 Litres
 Exterior Wall Height: 1.7m
 Bench Seat (L) with Step: 2.09m
 Weight: 9 Tonnes

Round Large

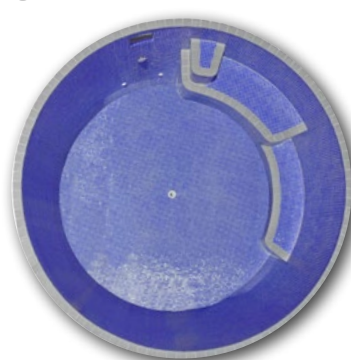

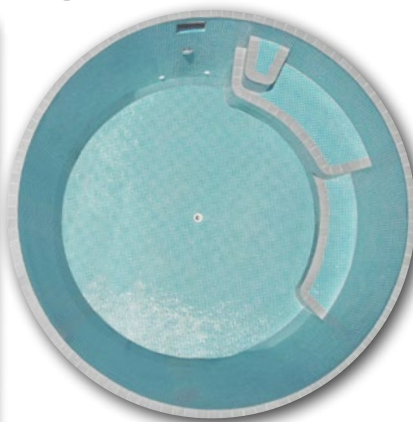

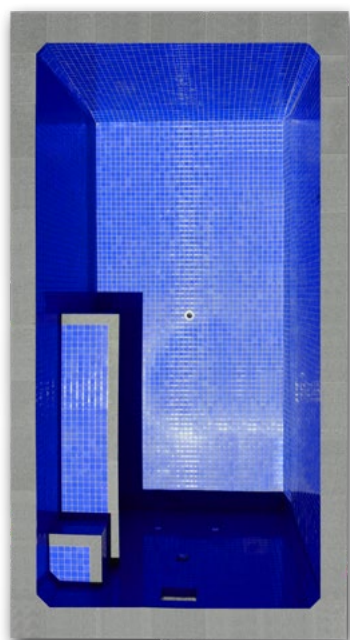

Diameter: 3.45m
 Max Water Depth: 1.7m
 Volume: 15,000 Litres
 Exterior Wall Height: 2m
 Bench Seat (L) with Step: 1.7m
 Standing Ledge: 1.7m
 Weight: 8.5 Tonnes

Round Medium

Diameter: 2.7m
 Max Water Depth: 1.7m
 Volume: 10,000 Litres
 Exterior Wall Height: 2m
 Bench Seat (L) with Step: 1.7m
